

(4) 12V Battery Pack

The image shows a custom-built robotic head assembly. At the top, a blue PCB is visible. Below it, a black 12V battery pack is mounted. Underneath the battery is an Odyssey X86 SBC. The front of the assembly features a black RealSense T265 camera module with two lenses. Below the camera is a RealSense L515 depth sensor. The entire assembly is supported by four metal rods. The labels are overlaid on the image in white text.
